## **DETAILED ACTION**

## Allowable Subject Matter

## 1. Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-6 and 11 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art. In claim 1, "adjusting a number of sustain pulses in each of the plural kinds of voltage waveforms according to a weight of luminance set for the at least one sustain period of the corresponding sub-field, wherein the plural kinds of sustain pulses bring light emissions that differ from one another". In claim 7, "applying plural kinds of sustain pulses in the different voltage waveforms for a sustain period of at least one sub-field; and adjusting a number of sustain pulses in the different voltage waveforms according to a weight of luminance set for the at least one sustain period of the corresponding sub-field, wherein one of the voltage waveforms of the sustain pulses is a steplike waveform. In claim 11, "a sustain pulse adjustment unit adjusting a number of the sustain pulses in each of the voltage waveforms to achieve a weight of luminance for the sustain period of the subfield, wherein sustain pullses having different voltage waveforms bring different respective light emission". In claim 12, "applying plural kinds of sustain pulses in the different voltage waveforms for a sustain period of at least one sub-field, at least one sustain pulse having a step-like waveform is applied in an initial phase of the sustain period, and another sustain pulse having a rectangular voltage waveform is applied in a subsequent phase in a common sustain period" The closest prior art Nagao et al. (6,653,993 B1) teaches a plasma display comprising a plurality sub-fields, a set-up, write, sustain and erase pulses, using a staircase waveform so as to

Application/Control Number: 10/799,663

Art Unit: 2629

control unwanted light emission at the time of initialization and erase discharge, improves contrast and luminous efficiency; , however, singularly or in combination with other prior art, fail to anticipate or render the above underlined limitations obvious.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mansour M. Said whose telephone number is 571-272-7679. The examiner can normally be reached on Monday through Thursday from 8:30-6:00 P.M. The examiner can also be reached on alternate Friday from 8:30 a.m. to 5:00 p.m. EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard A. Hjerpe whose telephone number is 571-272-7681.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to: 57

571-273-8300 (for Technology Center 2600 only)

Hand-delivered responses should be brought to the Customer Service Window at the Randolph Building, 401, Dulany Street, Alexandria, VA 22314.

Application/Control Number: 10/799,663

Art Unit: 2629

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be

obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
